

About Us

Jadestone Energy is an independent oil and gas company focused on the Asia Pacific region. It has a balanced, low risk, full cycle portfolio of development, production and exploration assets in Australia, Vietnam and the Philippines. Led by an experienced management team with a track record of delivery, who were core to the successful growth of Talisman's Asia Pacific business, the Company is pursuing an acquisition strategy focused on growth and creating value through identifying, acquiring, developing and operating assets in select upstream oil & gas basins in the Asia Pacific region.

Jadestone Energy is headquartered in Singapore, has its principal technical team in Kuala Lumpur and country operational offices in Perth, Jakarta, and Ho Chi Minh City.

Jadestone Energy is listed on the TSX Venture Exchange (TSXV: "JSE") and on AIM (AIM: "JSE").

Operations

- Jadestone is the 100% owner of the producing Montara oil project, offshore Australia, and is expecting to be formally granted operatorship of the asset upon approval from NOPSEMA. Jadestone has a 100% operated working interest in Stag, offshore Australia, an oil producing field with development and exploration potential.
- The Company has a 100% operated working interest (subject to registration of PVEP's withdrawal) in two gas development blocks in Southwest Vietnam containing three discovered gas fields, and is partnered with Total in the Philippines, where it holds a 25% working interest in the SC56 exploration block.
- Jadestone plans to build its asset portfolio through the acquisition of producing assets and/or discovered resources, where there are significant opportunities for operating efficiencies, cost reduction and increased production through further investment.

Who are we looking for?

- Individuals who are passionate, enthusiastic and provide critical expertise to drive Jadestone Energy's growth, strategy and value generation. As a company with three core operating areas in the Asia Pacific region, it is important that all our employees are culturally sensitive and respectful of others.
- Jadestone Energy is also committed to reducing our environmental footprint whilst bringing the social and economic benefits of our industry to the countries in which we operate. Employees are expected to value this commitment whilst always delivering safe and efficient operations across assets, cultures and geographies.

What we offer:

- An exciting and highly nimble work environment where employees will collaborate with a diverse international team who will encourage them to learn, grow, challenge themselves and show their entrepreneurial spirit.
- At Jadestone Energy, you will join a company with a leadership team that has a proven industry track record of success. Jadestone Energy is a new and exciting company, with a pioneering spirit where individuals can truly make a difference and flourish.

JOB DESCRIPTION

Job Title:	Application Support Specialist	Reports to (title):	Group IT Manager
Department:	IT	Location:	Kuala Lumpur

1. POSITION PURPOSE

The application support specialist responsibilities include providing necessary technical support relating to various applications, system-level software, compilers, and other general computing applications. The incumbent is responsible for any malfunctioning of applications or software systems and analysing necessary software requirements. The incumbent also participates in the research and system application needs to visualize any problems for users, and also provide assistance to the users regarding the use of various software applications.

2. WORKING RELATIONSHIPS

Positions supervised	Direct:	None
	Indirect:	None
Working relationships	Internal:	All levels of employees
	External:	IT Vendors

3. PRINCIPAL ACCOUNTABILITIES

Application: Designing, coding, testing and installing applications programs. Upgrade interfaces by updating the hardware for better performance of the system. Undergo a detailed study of the existing system to and recommend installation or up gradation of a new system.

Assess problems: Application Support Analyst will receive complaints and inquiries through a variety of channels, including email, phone and live chat. In addition to making sure that each individual complaint is properly dealt with, the incumbent also need to assess any problem as a whole so that particular areas of concern can be identified.

Proactively problem-solve: Beyond solving problems which have already arisen, the role must also come up with plans designed to help avoid problems in the first place. This involves regularly evaluating the current state of the application, identifying aspects which could be improved and recommend changes in order to facilitate those improvements.

Lead developers: Ensuring consistent day-to-day maintenance and continuously work together with the team of software developers and production support to accomplish this. Correcting errors if any and modifying the existing software.

Provide on-call support: Along with analysing big-picture problems and solutions, the role will often need to provide on-call tech support to an application's users, which can either occur on an as-needed basis or be a regular responsibility. Interaction with users can take place through phone calls, emails or live chat and requires the incumbent to give each user their full attention. Provide direction during software programming and development of documentation.

Keep records: required to take long-term positive changes into consideration as well as short-term problem-solving. To lay the groundwork for those changes to take place, the role will be required to keep detailed records of the application's performance and shortcomings for senior-level staff to review and analyse.
